Home Health Agency

Transitions of Care

for Your Medicare and Managed Care Patients

Your Patient is in Good Hands with Byram Healthcare

Byram Healthcare ensures your patient's transition from home health care is seamless. By offering comprehensive wound, ostomy,and continence care programs along with unmatched Medicare B and direct insurance billing expertise, Byram is able to continue caring for your patient while assisting the agency with your discharge requirements.

Easy

When your patient is ready to be discharged from service, please call our Home Health Agency Center of Excellence at 1-800-248-4546 to ensure a seamless transition. Your patients will continue to receive the same quality products used while on service.

Quick

Byram will process an order 24 hours after discharge. This reduces agency supply costs, as there is no need to stock the patient up at discharge to hold them over during their transition.

Hassle Free

There are no up-front costs* and Byram does not charge for shipping to the patient's home. Byram will obtain all necessary documentation and bill the patient's Medicare or Managed Care plan directly.

Reassuring

Byram will call your patient when they are due to reorder their supplies. Our compliance call program ensures your patient receives the supplies they need. Your patient will also have access to our Clinical CareLines for any questions regarding their supplies.

**Byram follows coverage guidelines of the patient's insurance*
